1. Introduction

Industries Qatar (hereinafter referred to as “IQ” or “the Company”), a Qatari public shareholding company listed on Qatar Stock Exchange, was incorporated on 19th of April 2003 in accordance with the provisions of its Articles of Association and the Commercial Companies Law promulgated by Law no. 5 of 2002, especially Article 68 thereof. IQ then brought its Articles of Association into conformity with the provisions of the Commercial Companies Law promulgated by Law no. 11 of 2015 as amended by Law no. 8 of 2021, having regard to the peculiar nature of its incorporation.

QatarEnergy, the founder, Special Shareholder and 51% majority shareholder, provides the Company with all the financial and head office services under a service-level agreement. IQ therefore applies some of QatarEnergy’s established rules and procedures of QatarEnergy as a service provider. As part of its Board of Directors’ efforts aimed at complying with the principles of corporate governance and applying industry-standard best practices, IQ management had made an agreement with a consultant to develop a Corporate Governance Framework, which was approved by the Board of Directors at its fourth meeting of 2011 held on 26th of December 2011.

2. Scope of implementation of the governance and compliance with its principles

Out of a firm belief in the importance and necessity of entrenching the principles of good governance to ensure and enhance value creation to shareholders, IQ Board of Directors is firmly committed to implementing governance principals set forth in the Governance Code for Companies and Legal Entities Listed on the Main Market issued by Qatar Financial Markets Authority (QFMA) pursuant to QFMA Board decision no. 5 of 2016, and in line with the provisions of the Company’s AoA.

In doing so, the Board defined the roles and responsibilities of the Board of Directors, Senior Executive Management and Company officials. It promotes the principals of justice and equality among stakeholders without discrimination and enables them to exercise and enjoy their rights, upholding values of protecting the minority. The Board maintains productive control and risk management, enhances transparency and disclosure and provides information to the stakeholders at the right time and in the manner that enables them to make sound decisions and do their business effectively.

Moreover, the Board of Directors upholds the values of corporate social responsibility, puts the interest of the Company and its stakeholders ahead of any

other interest, carries out its roles and responsibilities in good faith, integrity, honor and sincerity and takes the responsibility arising therefrom to the stakeholders and community.

The Board of Directors always ensures that an organizational framework, that is consistent with the legal and institutional framework of the listed companies, is in place at the Company level. This is achieved through a process of reviewing and updating governance applications, as and when required. In addition, the Board of Directors endeavors to maintain a Code of Conduct that reflects the values held by the Company and ensures the establishment of the principals of transparency, upholding the values of self-control and integrity and acknowledging responsibility.

In addition, as the head office service provider, QatarEnergy ensures that its concerned staff are made aware of and trained on risk management, self-control and professional code of conduct, anti-bribery and corruption, conflict of interest and information classification and security, among others.

Taking into account the provisions of Article no. 2 of QFMA Governance Code, the Company strictly observes the provisions of QFMA Governance Code and endeavors to maintain its official documents in conformity with such Code to ensure full and proper application of the provisions thereof.

3. Board of Directors

3-1 Board Structure

Industries Qatar was established by QatarEnergy, a Qatari state-owned public corporation established by Decree Law no. 10 of 1974, as a parent company of a group of companies that have been operating for decades in strategic and critical sectors - petrochemicals, fertilizers, steel - to enhance and manage a major component of the economic diversification of the value-added chain in Qatar, and to help achieve this goal by managing a group of sustainable value-added companies in their sectors, which in turn contributes to the industrial development in Qatar, while playing a major role in the development of the relevant sectors.

In addition, Qatari nationals were given investment opportunity, as Industries Qatar went public and listed on Qatar Stock Exchange by QatarEnergy to share the generated profits with them, ensuring they get the maximum benefit. Also, the IPO price was lower than the fair estimate of the share value. All shareholders receive annual dividends in proportion to their shareholdings.

Recognizing the peculiar nature of IQ's activities and incorporation, the Company's strategic position as one of the main pillars of Qatar's economy, and

taking into account the public interest, it was therefore critical, to make sure state assets and production facilities are properly managed in a manner that ensures sustainability and creates value for the Company's shareholders, that QatarEnergy, the founder of the Company, retains special privileges, including the Special Share. These special privileges are provided for in article no. 77 of the Commercial Companies Law promulgated by Law no. 5 of 2002 at that time, which are still in effect as part of the provisions of the Commercial Companies Law promulgated by Law no. 11 of 2015 as amended by Law no. 8 of 2021. In addition, article no.152 states that the Company's Articles of Association may provide for the determination of some privileges for a class of shares, provided that the shares of the same class are equal in rights, advantages and restrictions.

Due to many reasons that show how closely the Company's financial and operational performance is connected to QatarEnergy, making it vital to maintain aligned strategy and vision, QatarEnergy, the Special Shareholder, had to reserve the right to appoint Board Directors and senior and executive management teams who are sufficiently qualified and experienced to perform their duties effectively in the best interest of the Company and dedicated to achieving its goals and objectives. The reasons are summarized as follows:

- QatarEnergy is the founder, Special Shareholder and 51% majority shareholder.
- The contractual obligations on QatarEnergy set out in the agreements signed with foreign partners in the subsidiaries, which were the basis for the establishment of the Company and transfer of QatarEnergy's stakes in the subsidiaries to Industries Qatar.
- Industries Qatar and its subsidiaries/joint ventures depend on QatarEnergy for supply of feedstock and infrastructure.
- Industries Qatar and its subsidiaries/joint ventures depend on QatarEnergy for technical, technological and marketing support.
- QatarEnergy provides the Company with all financial and head office services under a comprehensive service-level agreement. These services are provided as and when requested to ensure that the operations of Industries Qatar are fully supported.

Therefore, the Board, in accordance with the Company's amended Articles of Associations, consists of up to eight (8) Directors, seven (7) of whom are appointed by the Special Shareholder, provided that the Chairman and Vice Chairman are amongst them. One (1) Director is appointed by the General Retirement and Social Insurance Authority.

The Special Shareholder, QatarEnergy, appoints seven (7) Directors, given the peculiar nature of the Company's incorporation and activity as noted earlier, while the eighth Director is appointed by the General Retirement and Social Insurance Authority. The composition of the Board of Directors and allocating a seat to the General Retirement and Social Insurance Authority came as part of QatarEnergy's endeavor to ensure participation of the General Retirement and Social Insurance Authority, as the second largest shareholder in IQ, through the appointment of one (1) Director.

The amendment to the composition of the Board of Directors was presented to and approved by the Company's Extraordinary General Assembly held on 13th of September 2020. The new composition of the Board of Directors came into effect as from the new term of office that commenced on 1st of March 2021, the date on which the General Assembly held its meeting to approve the financial statements for the financial year ended 31st of December 2020.

Moreover, the Extraordinary General Assembly approved the addition of Article 22-3 which reads as follows: "In the event that the total ownership percentage of the Civil Pension Fund and Military Pension Fund (of the General Retirement and Social Insurance Authority) in the Company's share capital falls below 15% (without prior approval of the Special Shareholder), the seat of the General Retirement and Social Insurance Authority on the Board and the right to appoint a Director to occupy such a seat shall be vested to the Special Shareholder."

Except for those matters required by the Company's Articles of Association to be decided by the shareholders, the Board of Directors of the Company shall enjoy the widest powers necessary to give full effect to the objects of the Company. The Board may delegate any such power to any one or more of the Directors.

3-2 Board Composition

Directors are appointed for renewable terms of three (3) years or such shorter periods (being no less than one (1) year). Pursuant to QatarEnergy's resolution no. 4 of 2021 passed on 3rd of March 2021, IQ Board of Directors was reconstituted in accordance with Article no. 22 of the Company's Articles of Association. Accordingly, seven (7) Directors were appointed by QatarEnergy with effect from 5th of March 2021 and one (1) Director was appointed by the General Retirement and Social Insurance Authority.

In accordance with the definition of the Independent Director in QFMA Governance Code, IQ Non-Executive Directors are Non-Independents, as they are representatives of a legal person that owns more than 5% of the Company's share capital. Therefore, the Board is composed of one (1) Executive Director and

seven (7) Non-Executive Non-Independent Directors as described in the Appendix on the Bios of Board Directors.

In accordance with the composition of the Board and its roles and responsibilities provided for in Board Charter, Manual of Authority and Company's Articles of Association, no one or more of Directors may have control over passing resolutions. Resolutions of the Board shall be passed by a simple majority of those Directors present and entitled to vote at the relevant meeting of the Board, each Director present having one vote.

QatarEnergy appoints only qualified and eligible Board Directors who are sufficiently experienced to perform their duties effectively in the best interest of the Company and dedicated to achieving its goals and objectives. In addition, QatarEnergy ensures that all of its representatives in group companies attend appropriate training and awareness programs so that group companies' boards of directors can achieve the highest levels of performance and adopt the best governance practices.

Industries Qatar makes timely disclosure of any and all resolutions by QatarEnergy concerning the composition of the Board of Directors or any change thereto (Directors' bios are included in the appendix to this report).

3-3 Key roles and responsibilities of the Board

The Board represents all shareholders and is one of the most important pillars upon which the implementation of the governance at Company level rests, the Board of Directors is accountable to shareholders for exercising due care and diligence in managing the Company in an effective manner, as well as establishing the principles of good governance at all levels to serve the interests of the Company, its shareholders and stakeholders for the greater good. Accordingly, the Board developed a Board Charter within the Corporate Governance Framework in accordance with the industry-standard best corporate governance practices. The roles and responsibilities of the Board and the duties which must be fully performed by Directors are specifically identified in the Charter, which is reviewed and amended following any relevant new changes made by regulators. In addition, the Governance Framework developed by the Board contains the job descriptions of all Board Directors according to their classification and the positions they may have in any Board Committee. The Framework also contains the job description of the Board Secretary.

As part of the Company's Board of Directors' efforts aimed at determining Board roles and responsibilities in accordance with QFMA Governance Code and ensuring adherence, Industries Qatar, based on the approval of the Company's

Extraordinary General Assembly meeting held on the 3rd of March 2022, amended article no. 28 “Directors’ Responsibilities and Liabilities” of its Articles of Association to read as follows: “The Board shall prepare a Charter called “Board Charter” detailing the Board’s functions, and rights, duties and responsibilities of the Chairman and Directors. It also develops and supervises proper internal control systems and risk management, appoints the Company’s Senior Executive Management and approves the succession planning concerning the management. It establishes mechanisms for dealing and cooperating with providers of financial services, financial analysis, credit rating and other service providers, supervises and ensures the appropriateness of internal control systems of the risk management, conducts periodic review of the Company’s internal control procedures mainly by the Board Audit Committee and approves the training and education in the Company that includes programs introducing the Company, its activities and governance in accordance with the Governance Code for Companies and Legal Entities Listed on the Main Market issued by QFMA.

The Board of Directors puts in place a corporate governance framework consistent with the provisions of QFMA Governance Code and oversees all aspects of the framework, monitors its effectiveness and makes amendments as required. The Board also reviews the Company's policies and procedures to ensure compliance with the relevant laws, regulations, IQ’s Memorandum of Association and Articles of Association.

The Board may delegate some of its functions or authorities to Board Committees or Special Committees. Special Committees are constituted to undertake specific tasks under written and clear instructions. In accordance with the Company’s Manual of Authority, the Board shall determine the authorities it may delegate to the executive management and the procedures for decision-making. The Board may also determine the matters that it retains the right to decide on. In all cases, the Board remains liable for all of its functions or authorities so delegated.

The Board carries out its functions and duties in accordance with the provisions of Article (9) of QFMA Governance Code, amongst which the Board shall not

enter into loans that spans more than three years and shall not sell or mortgage real estate of the Company, or drop the Company's debts, unless it is authorized to do so by the Company's Articles of Association, which so authorize to the Company's Board of Directors. In addition, under IQ internal regulations, including Board Charter, the Board shall ensure that the Company adheres to its Articles of Association and the applicable laws and regulations, including QFMA regulations. Also, the Board may not act or make transactions that do not comply with the relevant laws and regulations, and that such actions or transactions must be approved by the relevant authorities, including the Company's General Assembly.

In accordance with the Company's AoA, all Directors shall be jointly and individually liable for any fraudulent act, abuse of power, negligent errors in management or violations of the Articles or Law.

3-4 Board Chairman

The Chairman is primarily responsible for the proper management of the Company in an effective and productive manner, making available for Board Directors all data and information in a timely manner. The Corporate Governance Framework includes the Chairman's job description (roles and responsibilities). As described in detail within the Governance Framework, these roles and responsibilities, whether strategic, operational or administrative, are well aligned with the Chairman's main objective of providing the strategic guidance to IQ, protecting shareholders' rights and achieving the Company's vision and strategic objectives profitably and sustainably.

In accordance with the Company's Articles of Association, the Chairman shall represent the Company towards Third Parties. The Vice Chairman shall substitute for the Chairman in his absence.

As part of its efforts to be in compliance with the provisions of the Commercial Companies Law as amended by Law no. 8 of 2021, Industries Qatar, based on the approval of the Company's Extraordinary General Assembly meeting held on the 3rd of March 2022, amended article no. 42 "Role of Chairman and Deputy Chairman" of its Articles of Association to read as follows: "The Chairman shall represent the Company towards Third Parties and Judiciary, and his signature shall be regarded by Third Parties and Judiciary as indicating approval by the Board of any transaction to which it relates. The Chairman shall implement the resolutions passed by the Board and abide by the recommendations thereof. The Chairman may delegate some of his powers to other Directors or members of the senior executive management. The delegation shall be of definite period and

subject. The Deputy Chairman (if any) shall substitute for the Chairman in his absence. Industries Qatar is the parent of a group of companies that operate in distinctive industries and its activities are not of an executive nature, thus the reasons to separate between the positions of the Chairman and the Managing Director cease to exist. However, the main purpose of separating the two positions is taken into consideration as follows:

- No one person in the Company should have unfettered powers or influence on decision making at the time of developing the Company’s Manual of Authority and the relevant regulations.
- The Chairman in his capacity as the Chairman or Managing Director is not a member in any of the Board Committees or Special Committees, while ensuring that committees’ Manuals of Authority and Terms of Reference are developed for effective functioning, members of the Committees are properly selected, and that committees’ Manuals of Authority and Terms of Reference are in line with best practices of governance.
- The roles and responsibilities of the Chairman are separated from those of the rest of Board Directors and members of the Company’s executive management.

4- Company's control system

The primary purpose of internal controls is to assist in achieving management's objective of ensuring, as far as practicable, the orderly and efficient conduct of its business, including adherence to management policies, the safeguarding of assets, the prevention and detection of fraud and error, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information. To achieve this, the Company adopted an internal control system that includes the development of internal controls over financial reporting, policies and operating procedures for risk management, internal and external audit, monitoring Company's compliance with the relevant regulations. Clear lines of self-control, responsibility and accountability throughout the Company are therefore set.

The internal control system is overseen by the Senior Executive Management, the Audit Committee and the Board of Directors to discuss observations on the internal controls. The Internal Auditor periodically makes and submits reports in this regard.

To ensure that best standards are applied in developing internal control systems and in accordance with the decision of the Board Audit Committee, a benchmarking study of the components of the Company's internal control system against the internationally recognized COSO Internal Control – Integrated Framework (2013) was conducted to adopt COSO Framework as a benchmark. COSO Internal Control – Integrated Framework (2013) consists of inter-related components, including control environment, risk assessment, control activities, information, communications and monitoring.

Internal control is an integral part of IQ's corporate governance, which involves the Board, Board Audit Committee, Senior Executive Management and employees at all organizational levels. It is a process which includes methods and processes to:

1. Safeguard IQ's assets.
2. Ensure the reliability and correctness of financial reporting.
3. Secure compliance with applicable legislation and guidelines.
4. Ensure that objectives are met and continuous improvement of operational efficiency.

The objective for IQ's financial reporting is to be in line with the highest professional standards and to be full, fair, accurate, punctual and understandable.

Moreover, having a benchmark framework, such as COSO Framework, will enable the management to establish and maintain an internal control system. The External Auditor can also use it as a benchmark framework to perform their duties in accordance with article no. 24 of QFMA Governance Code for Companies & Legal Entities Listed on the Main Market issued pursuant to QFMA's Board Decision no. 5 of 2016, in particular with regard to the assessment of the appropriateness and effectiveness of internal control systems implemented in the Company.

To ensure compliance with the provisions of Article no. 4 of QFMA Governance Code, Industries Qatar should:

1. Establish and maintain adequate and effective internal controls over financial reporting to mitigate the risk of significant misstatements.
2. Evaluate and assess the adequacy and effectiveness of the internal controls over financial reporting to mitigate the risk of significant misstatements.

To achieve this, the Company's internal controls over financial reporting were assessed based on the Company's 2021 standalone financial statements. A top-down approach was used in designing and testing of the Company's framework wherein it begins at the financial statement level and with the understanding of the overall risks to internal controls over financial reporting.

Business risks were assessed using the Company's 2021 standalone financial statements. The risk assessment, which involved application of "Materiality" on IQ's 2021 standalone financial statements (considering the qualitative and quantitative factors) based on the inputs of the External Auditor and the best practices, was made to determine the significant accounts, disclosures, their relevant assertions and applicable business processes within the Company for controls identification, evaluation and testing.

This approach directs attention to accounts, disclosures, and assertions that present a reasonable possibility of material misstatement to the financial statements and related disclosures. The next activity involves understanding of the risks in the Company's processes relevant to the identified significant accounts, disclosures and assertions based on risk assessment and testing those controls that sufficiently address the assessed risk of misstatement to each relevant assertion. This process can be detailed as follows:

Risk assessment:

1. Identifying and assessing the risks of material misstatement in the financial statements.
2. Determining materiality (considering the qualitative and quantitative factors), external audit input, and other factors relating to the determination of material weaknesses.
3. Identifying classes of transactions, significant account balances, disclosures, their relevant assertions and applicable business processes based on determined materiality. The financial statement assertions include existence or occurrence, completeness, valuation or allocation, rights and obligations and disclosures.

Perform walkthrough:

Following the risk assessment, the relevant internal controls which mitigate the risk of material misstatements for applicable business processes are identified through walkthroughs by reviewing the established policies and procedures, enquiries with management and process owners and understanding the flow of transactions.

These internal controls are grouped as follows:

1. Entity Level Controls (ELCs) – present across the Company and include measures taken by management to equip staff to adequately manage risks through raising awareness, providing appropriate knowledge and tools as well as developing skills.
2. Information Technology General Controls (ITGCs) - The ITGC (applicable IT applications and infrastructure relevant to identified business process) on Company's general IT infrastructure and systems.
3. Business Process Controls - both manual and automated, are embedded in business processes applicable to financial transactions. These controls may change over time due to changes in the Company's business processes.

A walkthrough involves following a transaction from origination through the Company's processes, including information systems, until it is reflected in the

Company's financial records, using the same documents and information technology that Company personnel use.

Walkthrough procedures usually include a combination of inquiry, observation, inspection of relevant documentation.

Test of internal controls:

Following the risk assessment and controls identification, a control testing is conducted on each of the identified controls to assess if they are designed adequately and operating effectively. Control testing encompasses three components: test of design effectiveness, test of operating effectiveness, and ongoing monitoring.

Test of Design Effectiveness:

Testing the design effectiveness of controls involves determining whether the Company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the Company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements in the financial statements. This will conclude if the Company has an adequate system of internal controls over financial reporting.

Testing the design includes a mix of inquiry of appropriate personnel, observation of the Company's operations, and inspection of relevant documentation.

Test of Operating effectiveness

Testing the operating effectiveness of controls involves obtaining evidence about whether the control is operating as designed throughout the relevant financial reporting period. For each control selected for testing operating effectiveness, the evidence necessary to conclude that the control is effective depends upon the risk associated with the control which is assessed based on factors such as nature and materiality of misstatement the control is intended to prevent, history of errors, frequency with which control operates, effectiveness of entity level controls, competency of personnel performing the control, nature of control i.e., automated or manual.

Evaluating identified deficiencies:

A 'deficiency' in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

Evaluation of the severity of each control deficiency should be made to determine whether the deficiencies, individually or in combination, are significant deficiencies or material weaknesses as of the balance sheet date.

The Company's management recognizes that a significant deficiency or weakness in internal controls over financial reporting increases the possibility that a misstatement in the Company's annual or interim financial statements will not be prevented or detected on a timely basis, which is important enough to merit attention of those charged with management and governance.

A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.

A deficiency in operating effectiveness exists when a properly designed control does not operate as designed, or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

Remediation Testing:

The Company ensures that any issues or deficiencies either relating to design or operative effectiveness of specific controls are remediated. Once a new control is in place or remediated, it should be given enough time for its operations to validate the control's operating effectiveness. The amount of time that a control should be in place and operating effectively depends on the nature of the control and how frequently it operates.

Based on its assessment of the Company's current internal controls over financial reporting and Testing of Design and Operating Effectiveness, the management believes that the Company has developed an appropriate internal control framework that meets the requirements of the internal control over financial reporting. Moreover, the management considers the developed framework as appropriate to form the basis for compliance with the requirements of Qatar Financial Markets Authority in this regard.

The following are the main elements of the Company's internal control framework:

4-1 Risk management

As a service provider under a service-level agreement, QatarEnergy' established risk management rules and regulations are applied. However, the Board of Directors endeavors to maintain an appropriate risk management framework at

Company level, as risk management is an integral part of company governance, which the shareholders expect from the Board of Directors.

This framework takes into consideration pursuing an integrated process for continuous risk management, starting from risk identification, assessment, measurement, management to monitoring as follows:

- Risk identification and assessment involve identifying and assessing all risks facing the Company. Risks are classified into four main categories: strategic, operational, financial and compliance related. For each risk, there must be measures to address it effectively, as well as a set of indicators to monitor changes in the overall risk structure and landscape. Risks are simulated in several scenarios in order to develop proper remedies and assess their cumulative impact on the performance of the Company.
- Risks are then measured based on the impact and possibility of their occurrence.
- Risks are managed with the possibility that their level is increased, decreased or maintained in a manner consistent with the determined level of risk accepted by the Company. During treatment, the Company takes into consideration that risks have a life cycle, i.e., before, during and after the occurrence. The Company ensures protection, and that regulations, operational procedures and controls are developed in accordance with the best practices to minimize and mitigate related risks.
- Risks are then monitored to ensure that any related problems are quickly identified and properly addressed.

4-2 Audit

4-2-1 Internal Audit

The Company periodically floats a tender for the engagement of an independent consultant to provide internal audit services in accordance with tendering procedures. - Provides the shareholders with sufficient information in quality and quantity on the date, location and agenda of the general meetings, as well as complete and timely information regarding the matters to be discussed at the meeting to enable them to make a decision. It also communicates the agenda to Qatar Stock Exchange for announcement on its website.

6-4-4 Dividend distribution

In accordance with the provisions of the Company's Articles of Association amended by the resolution of the Extraordinary General Assembly held on 28th of February 2017 and pursuant to the resolution of the Extraordinary General Assembly held on 4th of March 2018 and without prejudice to the Company's ability to fulfill its obligations towards third parties and pursuant to a resolution

by the General Assembly, dividends of not less than five (5) percent of the net profits of the Company after deducting legal deductions shall be distributed to registered shareholders at the end of trading session on the day on which the General Assembly is convened, provided that dividends shall not exceed the amount recommended by the Board.

The main lines of the dividend distribution policy included in the Company's Corporate Governance Framework are explained in the attachments to the meeting agenda of the Company's General Assembly. In general, the dividend policy requires the Company to balance shareholders' expectations with its operational and investment needs. This is achieved through investigating the following factors before a recommendation on the dividend distribution could be presented to the General Assembly:

- Cash flow constraints: It is not obligatory on IQ to distribute full profit to the shareholders. IQ shall keep sufficient cash for its operational requirements before dividend distribution.
- Lenders Constraints: IQ shall satisfy the financial requirement of lenders, if any.
- Legal constraints: Any legal reserves shall be reserved before distributing the dividend.
- Future investment plan: IQ investment plans shall be considered and sufficient cash shall be retained before dividend distribution unless it has been decided to fund the investment through additional share capital or bank financing.

The proposed annual dividend is subject to the final approval of the General Assembly. The Company, through its agreement with a local bank, Qatar National Bank, makes it easier for the entitled shareholders to claim their dividends for the year or previous years by making transfers to the accounts of the shareholders who provided their bank account details to Qatar Central Securities Depository or submitted a request for transferring their dividends to any QNB branch. The Company's website is updated with the required documents and all related details to claim dividends.

As for the resolution of the Company's General Assembly passed in 2022 for the financial year ended 31st of December 2021, the Assembly approved Board recommendation for a dividend of QR 1 per share for 2021, representing 100% of the nominal share value.

As for the financial year ended 31st of December 2022, the Board of Directors' recommendation for a dividend payment of QR 1.1 per share for 2022,

representing 110% of the nominal value of share will be presented at the Company's General Assembly meeting that will be held on 15th of March 2023.

6-5 Conducting Major Transactions

The Company is committed to treat all shareholders equitably. Shareholders of each class of shares are equal and have all the rights arising from the share ownership in accordance with the provisions of the relevant law, regulations and decisions. The Company ensures that minority shareholders are protected against abusive actions by, or in the interest of, controlling shareholders acting either directly or indirectly.

Therefore, the Company ensures that all shareholders are equitably treated at the General Assembly meeting, and that voting process is facilitated without prejudice to the provisions of its AoA.

In accordance with the Company's Articles of Associations, shareholders in general and Minorities in particular may, in the event that the Company conducts Major Transactions that might harm their interests or prejudice the ownership of the Company's share capital, object and enter such objection into the record of the meeting and to invalidate the objected transaction without prejudice to the provisions of the Articles in this regard.

The Company's capital structure is disclosed in the financial statements and herein. Additionally, Qatar Stock Exchange discloses the Company's major shareholders on its website.

With the exception of some selected entities identified in the Company's Articles of Association, no person or entity, shall hold either directly or indirectly (or be beneficially entitled to) shares of a nominal value exceeding 2% of the Company's share capital. The maximum ownership of the company's share capital is 2%. Qatar Central Securities Depository (QCSD), the entity entrusted with managing the register of the Company's shareholders, ensures that this maximum ownership limit is maintained.

Industries Qatar, based on the approval of the Company's Extraordinary General Assembly meeting held on 3rd of March 2022, amended article no. 20 "Restrictions on shareholding" of its Articles of Association to read as follows: "The Board of Directors may, by a Board resolution considering applicable rules and regulations, determine the ownership percentage of non-Qatari shareholders up to one hundred percent (100%) of the shares listed on Qatar Stock Exchange or on any regulated stock market."

Accordingly, a decision was made by the Company's Board of Directors at its meeting held in April 2022 to increase the ownership limit for non-Qatari shareholders to 100%. All necessary measures were then taken in this regard with the relevant authorities. Pursuant to a decision made by the Council of Ministers in its meeting held on 12 October 2022, it was approved to increase the percentage of ownership of a non-Qatari investor in the Company's capital up to 100%.

Details of shareholdings in IQ's share capital could be obtained from Qatar Central Securities Depository based on the register of shareholders. Details of major shareholdings as of 29th of December 2022 are as follows:

6-6 Stakeholder rights (non-shareholders)

IQ safeguards and ensures respect for the rights of the Company's stakeholders in accordance with QFMA Code. Each stakeholder may request the information related to his interest upon submitting a proof of identity. The Company is committed to provide the requested information in a timely manner and in a way that does not threaten others' interests or prejudice its interests.

A whistleblowing policy and related procedures were adopted within the Company's Corporate Governance Framework to disclose any wrongdoing that may adversely impact the Company, its customers, shareholders, employees or the public at large. Under the policy, IQ assigns a member of the Board Audit Committee to address whistleblowing concerns. The assigned Committee member ensures that issues raised through whistleblowing are raised and reported to the Board Audit Committee according to the materiality of the issue.

A whistleblowing hotline (+974) 4013-2801 was established and provided on the Company's website (www.iq.com.qa) to report malpractice, unlawful or unethical behaviour.

These procedures are also a key defense against management override of internal controls and thus can help improve corporate governance.

Industries Qatar recognizes that the decision to report a concern can be a difficult one to make, not least because of the fear of reprisal from those responsible for the malpractice. IQ will not tolerate harassment or victimization and will take action to protect the whistle-blower that raises a concern in good faith.
